MODERN SILVER COINAGE 1981

THE SILVER INSTITUTE
1001 Connecticut Ave., N.W., Washington, D.C. 20036 U.S.A.

Introduction

Modern Silver Coinage—1981 provides complete information on all silver money issued in the calendar year 1981.

The statistics have been verified by the monetary authorities of the issuing countries and are the result of extensive contacts and consultations with ministries of finance, central banks, government and private mints, and numismatic experts throughout the world.

Physical characteristics of coins are given in millimeters, grams and troy ounces for which the equivalents are shown below.

1 millimeter	= 0.03937 inch	1 troy ounce	= 1.097 avoirdupois ounces
1 gram	= 0.03215 troy ounce	1 troy ounce	= 31.1 grams
1 troy ounce	= 480 grains	1 million troy ounces	= 31.1 metric tonnes

The first pages of this report provide a Summary showing the number of issues and the face value of silver coinage issued by each country, and the consumption of pure silver for coinage by each country and for the world. Pages following the Summary are alphabetically arranged by country. These pages describe in detail every silver money issue by each country in 1981, with calculations carried to the fourth decimal.

Silver Coinages described in this book are money, denominated by the issuing governments in units of national currencies or in troy ounces of pure silver content.

Number of Coins Issued refers to the number which became money in the calendar year 1981, with the following exception: if an issuing government's coin accounting system is only on an issue basis and not on a calendar year basis, then the Official Limit of the 1981 issue is shown, and so noted.

Silver Medals and Medallions not issued as money are not included in this compendium.

The preparation of this study has been made possible only by the generous cooperation of mint directors around the world, the governors of central banks, ministers of finance, economists and numismatic experts who have contributed liberally of their time and energy for the realization of Modern Silver Coinage—1981. We gratefully acknowledge their invaluable aid.

How To Purchase These Silver Coins

The 258 silver coinages issued in 1981 were struck by 37 different mints. In this book, above the description of each coinage issue, is the full name and address of the mint which produced it.

Information on how to purchase these coins may be obtained from coin dealers, or by writing to the mint which produced them.
